**Mold Resistant Coating:**

**MRC-100-1**

**QUICK DRYING • MOLD RESISTANT**

**BRIGHT WHITE • WATER-BASED FORMULA**

MEETS ASTM STANDARDS E550 AND 3273

**FEATURES AND BENEFITS:**

- Easy, ready-to-use formula
- Apply with brush, roller or sprayer
- Bonds to porous and semi-porous surfaces
- Dries to touch in 30 minutes
- Hides many ugly stains
- Can be used as a one-coat hiding for up to 500 square feet/gallon
- Provides mold resistance for up to 30 years
- Environmentally responsible coating

**COVERAGE RATE:**

- Only one coat is necessary for mold prevention. A second coat may be needed for hiding efficiency. A second coat, of a high quality exterior paint, should be applied for outdoor applications.

**APPLICATION:**

- For airless sprayer method, apply with 0.015 spray tip using medium pressure settings. Apply when surface and air temperatures are 40°F-90°F (5-32°C).

**COVERAGE RATE:**

- One U.S. Gallon (3.78 L) will cover approximately 500 square feet.

**STORAGE & DISPOSAL:**

- Store in original container in a dry, cool place. Dispose of unusable contents in accordance with local, state and federal regulations.

**LIMITATIONS:**

- The guaranteed protection of the dried coating from mold and mildew is a result of the EPA registered antimicrobial properties of the coating formulation.

**WARNING:**

- Always follow the precautionary statements, safety data sheets, and application instructions on the label of the product.

**ATTENTION:**

- Before sanding, scraping or otherwise distributing old paint (pre-1978 housing), be sure to review the Federal Register, 54 FR 39340, May 24, 1989, as amended by 58 FR 52166, Oct. 1, 1993. The条评论 (EPA) has determined that exposure to lead from pre-1978 housing poses a risk to health. Contractors must take special precautions for housing built before 1978 containing lead-based paint. There must be written negative lead test results before removal work can begin.

**EDUCATION RULE:**

- For additional information for details.

**FOR USE ON:**

- Interior White
- Deep Base
- Accent Base
- Tint Base
- Stucco, studs, subfloors, trusses, wall cavities and exterior surfaces of HVAC systems
- Freezing and/or condensate in pipes, ducts, walls, windows, etc.
- Garages, basements, crawl spaces, utility rooms, garage floors, roof decks, concrete slabs, cement, stucco, spray concrete, precast and poured concrete, gift laden, wood, and most other surfaces

**MANUFACTURED FOR:**

- Contec, Inc.
