ULTRA ABSORBENT PAD
Spill Pad and Mop
Ideal for high irrigation and large spills

The Ultra Absorbent Pad from Contec Professional solves the need for large volume absorption and containment. It contains SAF material that jellifies liquid for easier pick-up and can be used as either a pad or a mop. For high irrigation cases, large spills, and other cleaning concerns where volume is an issue, the Ultra Absorbent Pad is an ideal choice. The pad absorbs quickly and is disposable. It can also be used for biohazardous spills, terminal cleans, turnovers, and general use. To maintain the cleaned area, follow up with the Premira® Disposable Microfiber Floor Pad.

FEATURES
• Holds over 2.5L of saline solution or up to 5L of water
• Traps absorbed liquid as a gel to help eliminate dripping
• Helps prevent cross contamination

VERSATILE - USE AS A PAD OR MOP
Easily convert the Ultra Absorbent Pad

Cleaning up with the Ultra Absorbent Pad is easy: simply place as many pads on the liquid or spill area as needed. However, if a mop is preferred, the Ultra Absorbent Pad can be folded easily and used with appropriate mop hardware. The SAF material inside each pad prevents the liquid from dripping and makes disposal easier.
