

Standard High Duster

For those hard to reach spaces

The Standard High Duster from Contec® Professional makes cleaning hard-to-reach spaces easier when paired with *Laundry-Free™* Premira® II Microfiber High Duster Covers. The flexible foam body bends to hug surface contours and reduces operator strain. The Standard High Duster can be used as a handheld tool to clean areas within arm's reach. For overhead surfaces, pair the Standard High Duster with the adapter and your choice of ZeroGravity™ QuickChange handles. It's ideal for cleaning HVAC ducts and vents, between walls and heavy equipment, and in other difficult to reach areas.

FEATURES

- Thin, flexible frame reaches areas where typical dusters cannot
- Reduces cross contamination risk when paired with a new *Laundry-Free™* Premira® II Microfiber High Duster cover
- Compatible with all ZeroGravity™ QuickChange handles when used with available adapter

Contec part no.	description	size	packaging
