Best Practices for Reopening Hospitality and Lodging 2020

Staying healthy in a post-pandemic world requires all of us to reduce the risk of exposure to COVID-19, by cleaning and disinfecting public and private spaces. The virus that causes COVID-19 can be managed if you follow the right steps and use the right products. For more information on what you can do to reduce the threat of COVID-19, please visit [coronavirus.gov](https://www.coronavirus.gov)

1. Prep

Make a plan for effective and consistent cleaning that is clear to all employees.

2. Clean

If facility has been closed for weeks, consider starting with a deep clean to remove visible dust and dirt.

3. Disinfect

Use cleaners, sanitizers and disinfectants according to instructions on the product labels.

4. Repeat

Recontamination can happen every time somebody touches a surface – clean and disinfect high-touch* surfaces often.

! **IMPORTANT NOTE:** Focus on **high-touch*** surfaces like elevator buttons, heat/air conditioning controls, tv remotes, coffee maker, tables, doorknobs and handles, light switches, countertops, desks, chairs, phones, keyboards, bathrooms, etc.

*Check manufacturer's instructions on how to clean electronics and touch screen devices.
